PROFILE SUMMARY

An Information Technology student and aspiring project manager and web developer with hands-on experience in academic projects covering project management, web development, system design, and networking. Skilled in Python, JavaScript, HTML & CSS, PHP, and MySQL, with a solid foundation in UI/UX, business and data analysis, and network troubleshooting. Organized, adaptable, and decisive, with strong time management and communication skills. Works well independently, but does best in a team where ideas are shared and tested. Eager to keep learning new technologies and take on new challenges.

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

PHINMA University of Pangasinan | June 2023 - Present

- Specializing in Business Informatics

PROJECTS

CommunityPulse+: Smart Barangay Issue & Incident Management System

Capstone Project | Oct 2025 - Oct 2026

PROJECT MANAGER — HTML | CSS | JAVASCRIPT | PYTHON | PHP | MYSQL

Worked with a team to design and develop CommunityPulse+, a web-based barangay issue and incident management system that streamlines the reporting, tracking, and management of community concerns.

- Provides a centralized platform for residents to report issues and for barangay personnel to manage them efficiently.
- Allows residents to track their reports and view status updates.
- Improves transparency, organization, and response to community concerns.
- Developed with a focus on usability, security, reliability, and responsive design.

Sual Municipal Hall Appointment App

Sophomore Project | Nov 2024 - March 2025

PROJECT MANAGER — XML | KOTLIN | MYSQL

Developed a mobile appointment system with a web-based admin panel for the Municipality of Sual, enabling seamless bookings and efficient management with email/SMS notifications.

- Successfully managed the team members and delivered the project on time
- Designed and developed a user-friendly GUI to ensure ease of understanding and accessibility for users
- Successfully developed a mobile application for the project deliverable

LapShowdown

Freshman Project | June 2023 - Oct 2023

PROJECT MANAGER — HTML| CSS| JAVASCRIPT

Developed a website featuring the latest laptops to assist users in finding their ideal device.

- Designed and developed a user-friendly GUI to ensure ease of understanding and accessibility for users
- Successfully managed the team members and delivered the project on time
- Efficiently managed time and resources consistently as a project manager
