PORTFOLIO

https://github.com/Guian20

github.com/Guian20

TECHNICAL SKILLS

- Software Development
- Project Management
- System Administration
- Web Development
- Database Management
- UI/UX Design

PROGRAMMING LANGUAGES, TOOLS & FRAMEWORKS

- Java
- Python
- PHP | JavaScript | MySQL
- MySQL
- HTML | CSS
- Git | GitHub
- Microsoft Office

CORE WORK SKILLS

- Leadership & Decision-Making
- Problem-Solving
- Critical Thinking
- Flexibility & Adaptability
- Work Ethics & Accountability
- Trainability & Continuous Learning

PROFILE SUMMARY

A fourth-year Bachelor of Science in Information Technology student with a strong foundation in software development, web technologies, and database management. Skilled in developing functional and user-friendly web applications using modern programming languages, tools, and frameworks. Experienced in front-end development and familiar with database-driven systems and collaborative software development. Demonstrates strong problem-solving, teamwork, communication, and project coordination skills, with a willingness to learn and adapt to new technologies. Dedicated to applying technical knowledge and contributing effectively to organizational goals.

EDUCATION AND CERTIFICATIONS

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

PHINMA University of Pangasinan | 2026 - Present

- Specializing in Business Informatics

PROJECTS

CUPFE EXPRESSO

SOPHOMORE Project

Role: Frontend Developer

Kotlin | JavaScript | PHP | HTML | CSS | SQL | MySQL | Android Studio

Worked collaboratively with a team to design and develop CupFe Expresso, a mobile and web-based coffee management system designed to streamline coffee shop operations, including customer management, order processing, and administrative tasks.

- Focused on creating a user-friendly, responsive, and efficient system using Kotlin and Android Studio for the mobile application, along with HTML, CSS, JavaScript, PHP, and MySQL for the web-based system and database management.
- Designed for use by customers and coffee shop administrators to improve order management, streamline daily operations, and provide a more convenient coffee ordering experience.
- Contributed to the development and implementation of the system, particularly in front-end design, functionality, and system integration.

ECOCOMM

SOPHOMORE Project

Role: Frontend Developer | Backend Developer

HTML | CSS | JavaScript | Solidity | Ollama (AI) | Blockchain | Ganache | MySQL

Collaborated with a team to design and develop EcoComm, a web-based platform integrating AI and blockchain technology to support sustainable community commerce, secure digital transactions, and efficient user interactions. Contributed to the development of the system's user interface, functionality, and database integration using HTML, CSS, JavaScript, Ollama, Ganache, and MySQL.

- Designed and developed EcoComm, a web-based platform that integrates AI and blockchain technology to support sustainable community commerce and digital transactions.
- Implemented Ollama-powered AI features to provide intelligent assistance and integrated blockchain technology through Ganache for secure and transparent transactions. Used JavaScript, HTML, CSS, and MySQL to develop the platform's interface, functionality, and database management.
- Designed the system to provide users with a user-friendly and reliable platform while promoting transparency, efficiency, and sustainable digital community interactions.

LOCALWORKS

CAPSTONE Project

Role: Project Manager

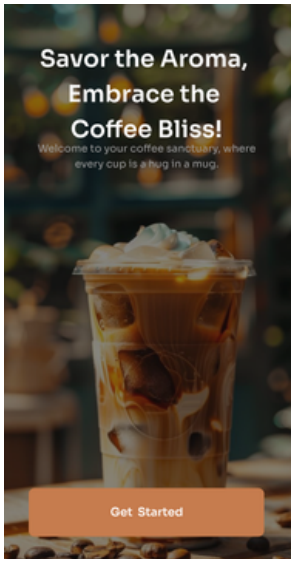

HTML | CSS w/ Tailwind | Typescript | Node.js w/ Express. js | MongoDB | React.js

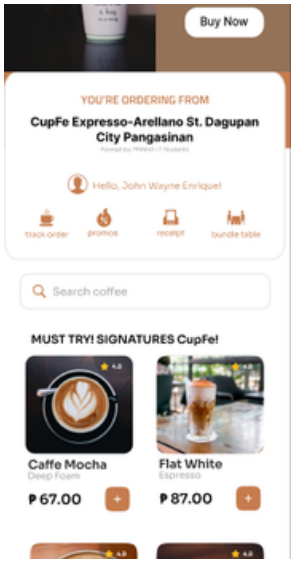

Collaborated with a team to design and develop LocalWorks, a web-based job matching platform that connects local workers with employers and promotes accessible employment opportunities within barangay communities.

- Contributed to the development of the user interface, job posting, worker profiles, job matching, and administrative features to support efficient hiring and employment processes.
- Led the development team in building and integrating the system's front-end, back-end, and database functionalities while coordinating tasks and ensuring project requirements were met.
- Helped create a user-friendly, responsive, and efficient platform that simplifies the process of finding local workers and job opportunities within the community.
